EDUCATION

Stanford University

Present

B.S. Computer Science and Energy Science and Engineering, ACT: 36, GPA: 3.92

Stanford, CA

- **Selected Coursework:** Stanford Climate Ventures Accelerator, Programming Methodology, Computer Org and Systems, Probability for CS, Linear Algebra and Multivar Calc, Mathematical Foundations for Computing
- **Honors:** Bruce Fishkin Fellow, Mercedes BeVisioneers Fellow

PROFESSIONAL EXPERIENCE

Econometric ML Climate Researcher

June 2024 - Present

Global Policy Lab, Stanford University

Stanford, CA

- Integration of COOP historical ground truth rain gauge data with environmental variables (pressure, temperature, wind field) in an IBTrACS-based data grid for 300+ tropical cyclones (TCs)
- Analysis of historical TC rainfall trends using rain-field heatmaps designed from ground truth data
- Data Driven Spatial Climate Impact Model (DSCIM) socioeconomic impact analysis with TC rainfall model

Demand-Side Strategy Energy Consultant

Oct 2025 – Jan 2026

Enline; AI for Energy Systems Startup

Mirandela, Portugal

- Led GTM strategy for sensorless digital twin platform in North America, conducted market sizing and analyzed demand drivers (grid congestion, wildfire liability) for U.S. utilities and RTOs
- Validated non-obvious \$6B+ customer segment (insurance), developed thesis reframing Vegetation Management (VGM) as a financial risk-mitigation tool, bypassing utility sales cycles

Computational Climate Researcher

Sep 2023 - July 2024

Centre for Atmospheric Science, University of Cambridge

Cambridge, UK

- Deployed the Finite Amplitude Impulse Response (FaIR) model to disaggregate the IPCC's Shared Socioeconomic Pathways (SSPs), quantifying GMST anomaly drivers by sector, region, and 40+ GHG species
- Found the "regional rivalry" pathway (SSP370) to be relatively non-CO₂ GHG heavy. Projected Asian/African regions to drive 57.13% of future CO₂ warming and identified F-gas warming as greater than previously modeled
- Selected to present full research findings at the CCIR Research Symposium to an audience of Nobel Laureates

LEADERSHIP

Founder

April 2023 – Present

Green Pulse EDU; international climate nonprofit

Chicago, IL

- Scaled nonprofit to 25+ chapters in 10+ nations, focused on environmental legislation and K-12 education
- Helped advocate for and write Illinois Climate Education Bill (HB4895) mandating climate education in every public school and Evanston plastic bag ban (200,000+ less plastic bags yearly)
- Directed outreach, delivering climate education to 5000+ students

President

Aug 2022 – June 2025

Kiva International Micro-Loaning Organization, local chapter

Chicago, IL

- Scaled and managed \$100,000 fund leading a 150+ member team in sourcing, performing diligence on, and deploying capital to 4000+ unbanked entrepreneurs across 72 countries and 15 sectors
- Organized school-wide singing and basketball competitions (S-Factor and Ballapalooza), raising tens of thousands of dollars annually to capitalize loan fund
- Through negotiating lending restrictions, restructured investment thesis to a high-risk, high-impact model, increasing societal ROI

ADDITIONAL

Awards: International Earth Science Olympiad Gold Medalist, Science Olympiad National Champion (Captain), First Perfect Scorer in NCF-Envirothon Internationals History, 3X Best Delegate at NAIMUN and CIMUN (largest international conferences), First Back-to-Back State Journalism Champions

Activities: Stanford Consulting (case: Databricks), Stanford Sustainable Investment Group (MCJ climate fund), SPBA Business Insights cohort, Energy Club (Energy Foundry Cohort), Climate Ventures (Greenhill HVAC Startup)

Interests: Squash (5.0+ rating), AI and climate econometric modeling, Fantasy Football, Gardening, BG2-Pod, Yuval Noah Harari and Vaclav Smil, Science Fiction (Inheritance cycle, Enderverse), *How 'bout them Cowboys?*
