EDUCATION

Stanford University

BS Candidate - Biomedical Computation & Economics

GPA: 3.84/4.0

Relevant Coursework: Healthcare Economics & Policy; Healthcare AI Seminar; CS Probability Theory; Algorithms & Data Structures; Cellular Trafficking & Neurodegeneration; Genes, Memes, & Behavior; Organic Chemistry; Biochemistry; Biology; Economics

The Nueva School

High school Diploma

GPA: 4.0/4.0; ACT: 35; PSAT: 1500 - National Merit Finalist

Stanford, CA

Expected: Jun 2027

San Mateo, CA

Aug 2019 - Jun 2023

RESEARCH & WORK EXPERIENCE

Stanford Consulting Group

Consultant - Software Strategy & AI

Stanford, CA

Nov 2025 - Present

- Develop LLM-based platform to screen Databricks 2026 Data + AI Summit speaker applicants based on historical submission cohorts.
- Engineer layered reasoning architecture for multimodal agent and advise Databricks product leadership on implementation strategy.

Stanford Healthcare Consulting Group

Project Manager

Stanford, CA

Sep 2025 - Jan 2026

- Led a technical redesign of Stanford Health Care Tri-Valley's Quality Intranet, streamlining data intake pipelines and centralizing key performance indicators to improve data throughput.
- Launched web pilot to relieve administrative burden, centralize datastreams, and improve functionality, increasing site usage by 20%.

Stanford Center for Advanced Functional Neuroimaging (CAFN)

Research Intern (AI)

Stanford, CA

Apr 2024 - Present

- Developed foundation deep learning model achieving >400x runtime reduction for neuroimaging spatial normalization.
- Designed lightweight UNET CNN architecture and LNCC loss term to optimize performance across heterogeneous MR modalities.
- Deployed multiprocessing pipelines to process 200,000+ raw brain scan series from 15 public studies into structured training cohorts.
- Engineered an open-source, production-facing web platform for model inference and query; **provisional patent pending**.
- Invited Speaker** - Presentation at Departmental Seminar for the Stanford Radiological Sciences Laboratory.
- 2nd Author** - Abstract - Selected for Podium Presentation at ISMRM 2025 Conference.

CamLab - Stanford Bioengineering REU Program (Research Experience for Undergraduates)

Research Intern

Stanford, CA

Jun 2025 - Dec 2026

- Used Python and MATLAB to extend a head biomechanics simulation framework, enabling strain calculation from axonal deformation using athlete impact kinematics data, enhancing prediction and surpassing prior studies in region-specific anatomical fidelity.
- Implemented algorithm to compute optimal spatial transformations aligning axon-fiber map to biokinematics model mesh coordinates.
- Devised an LS-DYNA subroutine for new model, improving finite element simulation for collegiate football and NFL headgear design.
- 1st Author** - Abstract - 2025 Biomedical Engineering Society conference; BioE REU Poster Presentation.

Stanford Department of Pediatric Orthopaedic Surgery

Data Intern

Stanford, CA

Jun 2025 - Aug 2025

- Constructed digital health dataset to train logistic regression ML model to predict outcomes in pediatric avascular necrosis patients.
- Conducted extensive data collection of 17 clinical features including steroid dosage cycles across 250+ electronic health records.

LEADERSHIP & PROJECTS

Halo - Startup

Co-Founder

Palo Alto, CA

Aug 2025 - Present

- Deployed and marketed B2B AI-Native platform automating prior auth. & pre-pay claims auditing for CMS-covered patients.
- Used LLM to analyze ICD and CPT codes against auditing guidelines to identify coding and compliance errors totaling 5 figures.
- Achieved 99.9% uptime and secure backend API to launch HIPAA-compliant pilot across SF health network.

Stanford Students for Biodesign and Biopharma

Lead Financial Officer, Teaching Assistant

Stanford, CA

Nov 2024 - Present

- Co-Lead (Research Grant Winner):** Developed EMS triage decision-support tool *concept* using NEMSIS prehospital data and EMT protocols. Defined structured data schema/feature set, and evaluation rubric for LLM feedback; won 1st Place \$500 research grant judged by Stanford Biodesign Scholars.
- Supervised resource allocation across 6 teams to fund club programs, Stanford courses, and invited speaker series.
- Teaching Assistant for Biodesign Fundamentals (MED175B) supporting computational and entrepreneurial student projects.

United Students for Veterans Health (Stanford Chapter)

Board Member

Menlo Park, CA

May 2025 - Present

- Acquired \$2000 in funding; Coordinated events for community engagement with veteran patients across care units (i.e. psych ward).

SKILLS & ACTIVITIES

Languages/Libraries: Python, MATLAB, R, C++, Unix, JavaScript, HTML, PyTorch, MONAI, Keras, Pandas, SQL, Flask, Fast API, ITK

Softwares: PyMOL, SPM, FSL, ANTs, DSI Studio, LS-DYNA (finite element analysis), Fusion 360, Agisoft Metashape

Other Activities: Stanford Men's Club Water Polo - Treasurer; Kappa Sigma - Philanthropy Chair; Rowing (6 years)
